This personable 22-year old New Zealander has recently burst forth as a musical phenomenon and has established himself as a brilliant accordionist. Grayson has taken top titles for the astounding musical prowess he demonstrates with his instrument in serious classics as well as crossover music styles. His accordion boasts the ability to bypass the conventional pre-set chords and offers the complete range of single bass notes enabling the artist to perform accurate renditions of any music style including classics.

Grayson took top honors as the foremost accordionist in both classical and entertainment categories in the 2009 Coupe Mondiale (Accordion World Cup). These outstanding performances followed his first place award at the Primus Ikaalinen International TV Competition in Finland and preceded his acclaimed appearance with an electronic accordion. No other accordionist has ever taken such an array of titles by mastering this wide range of musical performance styles.
